

Abdulyekeen Maadan

Frontend Developer · React · TypeScript · Go

Lagos, Nigeria · babatundemaadan@gmail.com · maadan.dev · github.com/maadan-dev · linkedin.com/in/abdulyekeenmaadan

SUMMARY

Frontend developer with 2+ years delivering production applications for real clients. Built and launched NextRole NG — a full-stack AI CV optimisation tool for the Nigerian job market — from scratch: Go backend, React/TypeScript frontend, two-phase Gemini pipeline, SSE streaming, and Supabase. The product reached 35+ users and processed 50+ analyses within weeks of launch with zero marketing budget at inception. Mathematics background; structured approach to architecture and debugging.

PRODUCTS

NextRole NG — AI CV Optimisation Tool · nextroleng.tech · Apr 2026 – Present

- Built a two-phase Gemini AI pipeline: Phase 1 extracts verified CV facts, Phase 2 generates tailored rewrites per Nigerian job category — architectural separation that eliminates hallucination.
 - Implemented SSE streaming for real-time results (~15s delivery), with multimodal PDF extraction handling Canva-formatted CVs.
 - Shipped role-specific prompt modules covering 10 Nigerian job categories with hard-coded institutional hiring knowledge.
 - 35+ users, 50+ analyses processed within weeks of launch. Users shared the tool in WhatsApp groups organically on day one.
 - Stack: Go, React, TypeScript, Tailwind CSS, Gemini API, Supabase, Railway, Vercel.
-

EXPERIENCE

Contract Frontend Developer · Self-Employed · May 2023 – Dec 2025

- Delivered production React/TypeScript interfaces for paying clients across travel, non-profit, and executive persona verticals.
 - ATEKER Luxury Safaris (Canada): defined brand color system and refined frontend UI for a luxury travel platform.
 - segunalabi.me: built multi-page digital platform for a C-suite executive and company founder.
 - Managed full project cycles independently — scoping, building, testing, and deploying without institutional support.
-

EDUCATION

Software Engineering Fellowship · Learn2Earn · June 2026 (incoming)

24-month AI engineering fellowship. Cohort 2. Founded by Iyinoluwa Aboyeji (co-founder, Andela & Flutterwave).

01-edu Piscine · Go, Algorithms, Unix · Learn2Earn, Yaba Lagos · March 2026

4-week intensive systems programming bootcamp. Scored 85% on final checkpoint.

B.Sc. Mathematics · Federal University of Agriculture, Abeokuta (FUNAAB) · 2019 – 2024

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Go, HTML5, CSS3

Frameworks: React, Vite, Tailwind CSS, Framer Motion

Backend & Data: Go (net/http), Supabase (PostgreSQL), REST APIs, SSE streaming

AI: Gemini API, Vertex AI, Prompt Engineering

Tools: Git/GitHub, Vercel, Railway, Figma, Chrome DevTools

ADDITIONAL

- Self-taught developer — built real client projects from scratch without formal CS training prior to Learn2Earn.
- Mathematics background informs a structured, logic-driven approach to architecture decisions and debugging.
- NYSC Discharge Certificate · 2025
