ABDULYEKEEN MAADAN

Software Developer · React · TypeScript · Go · AI-Augmented Development

Lagos, Nigeria · babatundemaadan@gmail.com · portfolio · github.com/Mafresh-BB · linkedin.com/in/abdulyekeenmaadan

SUMMARY

Software developer with a Mathematics background and 2+ years delivering production applications for real clients. Ships across the full frontend stack — React, TypeScript, Go — and builds AI-augmented products using Gemini and SSE streaming pipelines. Most recently launched NextRole NG, a full-stack CV optimisation tool for the Nigerian job market, which gained organic traction in its first week. Works with AI agents as a core part of the development workflow — directing them with precise, scoped instructions to produce production-ready code efficiently.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Go, HTML5, CSS3

Frameworks & Libraries: React, Vite, Tailwind CSS, Framer Motion

Backend & Data: Go (net/http), Supabase (PostgreSQL), REST APIs, SSE streaming

AI & Automation: Gemini API, AI-Augmented Development, Prompt Engineering

Tools: Git/GitHub, Vercel, Railway, Figma, Chrome DevTools

PROJECTS

NextRole NG — Full-Stack AI CV Optimisation Tool · nextrole-ng.vercel.app

- Built a two-phase Gemini AI pipeline: Phase 1 extracts verified CV facts, Phase 2 generates tailored rewrites per Nigerian job category — reducing hallucination and improving output reliability.
- Implemented SSE streaming for real-time results (~15 seconds), with multimodal PDF extraction handling Canva-formatted CVs.
- Built role-specific prompt modules for 10 Nigerian job categories with hard-coded institutional knowledge of the local hiring market.
- Gained organic traction within the first week — users sharing the tool in WhatsApp groups unprompted.
- Stack: Go, React, TypeScript, Tailwind CSS, Gemini API, Supabase, Railway, Vercel.

ATEKER Luxury Safaris — UI Developer (Contract) · atekersafaris.ca

- Developed responsive hero section and interactive horizontal scroll cards for a premium safari brand.
- Collaborated on brand visual refresh using React, TypeScript, Tailwind CSS, and Framer Motion; delivered mobile-optimised landing experience.
- Enforced strict TypeScript typing across API boundaries; built dev-mode fallback to maintain build velocity.

Executive Persona Platform — Frontend Developer · segunalabi.me

- Designed and implemented a clean, purposeful design system for a diplomatic executive's digital presence.
- Focused on typography, whitespace, and rendering performance — achieving zero layout shift across all viewports.
- Stack: React, JavaScript, Tailwind CSS.

EXPERIENCE

Contract Frontend Developer · Self-Employed · *May 2023 – Dec 2025*

- Delivered production React/TypeScript interfaces for multiple paying clients across travel, non-profit, and executive persona verticals.
- Managed full project cycles independently — scoping, building, testing, and deploying without institutional support.
- Optimised asset loading and rendering performance to achieve 90+ Lighthouse scores across all client projects.

STEM Educator (NYSC) · Royal Brook High School · *Jan 2025 – Dec 2025*

- Fulfilled national service as a STEM educator while maintaining an active freelance development schedule in parallel.

EDUCATION

B.Sc. Mathematics · Federal University of Agriculture, Abeokuta (FUNAAB) · *2019 – 2024*

01-edu Piscine · Learn2Earn, Yaba Lagos · *March 2026*

Intensive 4-week systems programming bootcamp in Go, algorithms, and Unix shell.

ADDITIONAL

- Self-taught developer — built real client projects from scratch without formal CS training or bootcamp support prior to Learn2Earn.
- AI-augmented development workflow: directs AI agents with precise, scoped instructions as a deliberate professional skill — not a shortcut.
- Mathematics background informs a structured, logic-driven approach to architecture decisions, debugging, and problem decomposition.
